ALOE WET WIPES

Increase the functionality in your Wet Wipes adding Aloe Vera

Aloe Vera wet wipes

Convenience has always been a major reason for the success of wet wipes. The other key feature for users is performance, whether cleansing a baby's bottom, removing makeup or any of the other targeted tasks. Now, more than ever, wet wipes for skin contact continue their path of market growth driven by performance.

Today's nonwovens, in both specialty and commodity categories, when combined with additives, offer still more possibilities and growth potential. Consumer wipes have been growing at almost 10% per year for the last decade, Wet wipes markets have moved well beyond concerns that they are "nice to have" to "must have" products. Wet wipes deliver features that build loyalty, particularly for skin contact benefits and adding Aloe Vera has become a key ingredient in Wet Wipes formulas.

Formulate a softening and refreshing natural wet wipes based on Aloe Vera, makes your wet wipes line to soothe and refresh the skin at the same time as leaving it feeling smooth, replenished, avoid rash, moisturize and soothe and other skin benefit features.

Wet wipes or, moist towelettes are small moistened non woven towels that can be used to cleanse the hands, refresh the face, or commonly to clean up the diaper area when you. In cleansing solution for skin wet wipes, more than any other consumer product category, a vital component is the product's functionality, in addition to functionality, consumers want to buy effective, healthy and natural products that protect their skin, as facial care, baby care, child care, feminine hygiene, patient care and adventure care. The natural category has exploded and now accounts for a growing percentage of the global Non-woven market and is climbing at one digit rates. The personal care industry goes natural and organic also, be natural in your products.

Create Aloe Vera Wet Wipes with Innovaloe™ from AMB Wellness

Our Aloe Vera are specifically designed for Cosmetic Compatibility

AMB cosmetic grade (CG) products have low bacterial plate counts making them suitable for use in a wide variety of wet wipes and personal care applications. Consumers are highly aware of the need to clean but protect and restore their skin.

Formulation Versatility

Innovaloe™ 200X Cosmetic grades are essentially odorless, and have no impact on product fragrance or color, and make clearless solution once diluted, no adding any color to your wet wipe products.

The personal care and hygiene industries have seen a dramatic growth in the number of new and innovative nonwoven product applications. The development of new properties and applications of wet wipes has been triggered by search for convenience and instant solutions to the always “on-the-go” lifestyles.

Aloe Vera enhances the delivered product properties of the wet wipes and wipe-type products. This has been particularly true for those wet wipe’s manufacture desire to improve add value as skin health or the ability to impart skin health benefits

Aloe Vera is one of the most famed skincare plants of all time.

The balance of physical properties, such as softness, flexibility, strength, integrity and resiliency has not been completely optimized. Topical chemistry may be used to enhance the delivered product properties of the wet wipes and wipe-type products. This has been particularly true for those wet wipe’s manufacture desire to improve add value as skin health or the ability to impart skin health benefits from natural sources.

AMB Wellness is conscious to improve skin health benefits for the Wet Wipes products or the skin health benefits imparted from the wipe product , introduce Innovaloe Aloe Vera powder 200X which are intended to condition, hydrate and sooth the skin without irritation for repeated contact the skin in order to better enhance the benefits to your clients of personal care or final consumers.

Cleansing action of Aloe Vera. Aloe contains also Saponin, this is another natural chemical constituent of Aloe Vera, which contains cleansing properties and antimicrobial and antifungal action properties, the bactericidal action causes normal cells resistant the attack of external aggressive agents.

Make Aloe Vera ingredient part of your formulas in wet wipes for being an excellent better cleansing action, in addition to moisturize the skin and soothes and prevents dryness after continuous use of wet wipes.

The astringent properties of Aloe Vera cleansing capacities of your Wet Wipes; the polluting effects of makeup, etc. His most visible effects are the changes in pH, clogged pores of the skin and good nutrition skin in its water exchange with the outside.

Aloe skin care applications

Packed with beneficial nutrients, Aloe is a key for a variety of skin care applications. In fact, the soothing properties of Aloe are particularly helpful during cleansing process of the skin's areas.

Compatibility with anionic, amphoteric, and nonionic surfactants and typical emollients or skin actives is excellent; Our Aloe Vera is compatible with most of the skin protection additives. Additionally, the CG lines are well suited for both zinc oxide and titanium dioxide sunscreen products, also for Acne Treatment wet wipes

Aloe nourishes the skin with body loving nutrients

Surprise your customers with Aloe Vera ingredients in your Wet Wipes products. The Wet Wipes industry often uses it as an emollient and moisturizer in a myriad of products such as moisturizers, face and hand creams, cleansers, soaps, suntan lotions, shaving preparations and baby lotions.

Aloe Vera improves the skin's ability to hydrate itself; it is therefore an active skin conditioning agent. Externally applied, it is a natural skin with the ability to penetrate into the skin and transport healthy substances through it.

Aloe Vera makes it a treatment for premature aging of skin, healing of wounds, burns, sunburns, eczema, hair loss, dandruff and more.

Aloe and saponins

It has been demonstrated that Aloe Vera extracts increase skin moisturization through a humectant mechanism. Indeed, this substance increases the quantity of water contained in the superficial part of the epidermis without increasing the TEWL (TransEpidermal Water Loss). The composition of the extract, rich in hygroscopic mono/polysaccharides and amino acids (histidine, arginine, threonine, serine, glycine and alanine), is probably responsible for improving water retention in the stratum corneum gives your skin proper acidity – pH for facial cleansin wet wipes and pads.

The problem is that standard cleaning agents have strong alkaline pH, and that elutes from the skin surface part of the natural protective layer – the hydrolipid mantle. The skin of a woman o babies quickly copes with this problem. It looks worse when the skin is dry, weakened by age, with a tendency to weaken with allergies or the oVerall bad condition of the body

AMB and HNSI are your Aloe Vera personal Care partner

It's time to renew your formula with ALOE VERA

AMB Wellness strives to preserve nature’s functionality by minimizing modification during processing. Additionally, process control and rigorous quality standards throughout production guarantee consistent, reliable product performance

Among its active components the Aloe Vera extracts (juices, concentrates and powders) from AMB Wellness products provide polysaccharides, protein, organic acid, vitamins, aminoacids and minerals that can be incorporated into formulations for moisturizing, anti-inflammation and skin lightening products, as well hair care products.

Aloe Vera is a great deal for wet wipes formulations

Rapid development and understanding of function mechanisms and chemistry of our body has developed the need for new natural ingredients. These ingredients are vital to a better quality of life. In order to preserve bioactive components of natural extracts and to ensure that the functionalities will also be found in the final product the formulation and manufacturing process are crucial.

Conscious of this new trend AMB R&D department has flexible customer service to support and develop products according need of the client's products.

We delivered natural properties of Aloe Vera in your hands

Aloe Vera is well respected for its application as a moisturizing agent. It contains vitamin B complex, folic acid, vitamin C and carotene. Use Aloe Vera with surfactants, instead of water in your formula substitute Aloe Vera in your wet wipes' lotion. Whether it's developing a wet wipes line to help skin feels completely clean and moisturized.

Add more life to your wet wipes products with natural bioactives from Aloe Vera.

- First: the polysaccharides act as moisturizers, hydrating the skin.
- Second: Aloe is absorbed into the skin and stimulates the fibroblasts to replicate themselves faster and it is these cells that produce the collagen and elastin fibers, so the skin becomes more elastic and less wrinkled.
- Third: Aloe makes the surface of the skin smoother because of its cohesive effect on the superficial flaking epidermal cells, binding them.
- Fourth: Aloe possesses the ability to interfere with the enzyme that produces melanin deposits in the skin, helping to prevent the formation of 'liver spots', which tend to develop in aging skin. When used regularly it may even help to eliminate existing spots.

Aloe Vera adds soft texture and helps babies skin to feel smoother

Deep cleansing

The most important effects caused skin Aloe is due to amino acid, particularly valine, phenylalanine, leucine and lignin, on skin pores.

The way that Aloe Vera acts on the pores of the skin, is remove the obstruction of all substances that keep skin can expel all the waste substances with external agents that are mixed with them. The properties of Aloe Vera saponification is conducted by the combination of amino acids and polysaccharides that make these accumulations of external fat and become contaminants foamy substances, being removable easily with daily grooming. This deep cleaning promotes exchanges with the outside can also penetrate water containing Aloe Vera this will produce a deep hydration of the skin.

Aloe Vera is well known as a natural moisturizer, but also is well known as a powerful astringent that has the ability to thoroughly clean all three layers of the skin, this deep cleaning pores and remove obstruction of glandular ducts, so the substances nutrient and water penetrates easily into the hypodermic layer. Although it is recommended for all skin types, it is especially recommended for oily or acneic, conserves water ungreased.

Another property of Aloe Vera is its high regenerative capacity, this is primarily based on the vitamins (A, B1, B2, B6, and B12) and polysaccharides present in Aloe Vera (glucomannan, pentoxa, hexose, galactose, etc.), which make it an active stimulant, its main functions are to relax the elastic fibers in the dermis, collagen fibers strengthen and stimulate the production of epithelial cells in the mucosal Malpighian body.

Aloe regenerates and stimulates the synthesis of collagen and elastic fibers of the skin are particularly suitable for facial make up remover pads, anti-acne cleansing pads. After that Aloe Vera has penetrated well into the skin can be served with both benefits, moisturize and cleanse at the same time

We delivered natural properties of Aloe Vera in your hands

Mechanism of actions of Aloe Vera in wet wipes lotion

Aloe has healing properties: Glucomannan, a mannose-rich polysaccharide, and gibberellin, a growth hormone, interacts fibroblast, thereby stimulating its activity and proliferation, which in turn significantly increases collagen synthesis after topical and oral Aloe Vera. Aloe gel not only increased collagen content of the wound but also changed collagen composition (more type III) and increased the degree of collagen cross linking. Due to this, it accelerated wound contraction and increased the breaking strength of resulting scar tissue. An increased synthesis of hyaluronic acid and dermatan sulfate in the granulation tissue of a healing wound following oral or topical treatment has been reported, ideal for baby wipes and patient care wet wipes.

Aloe Vera helps in healing activity at the epithelial level of the skin, a layer of cells that cover the body. It acts as a protective layer on the skin and helps replenish its moisture. Because of its nutritional qualities and antioxidant properties, the skin heals quicker. Moisturizing effect Mucopolysaccharides help in binding moisture into the skin. Aloe stimulates fibroblast which produces the collagen and elastin fibers making the skin more elastic and less wrinkled. It also has cohesive effects on the superficial flaking epidermal cells by sticking them together, which softens the skin. The amino acids also soften hardened skin cells and zinc acts as an astringent to tighten pores. It acts as a moisturizer. Aloe moisturizes the skin without giving it a greasy feel, so it's perfect for anyone with an oily skin complexion.

Aloe moisturizes the skin without giving it a greasy feel, so it's perfect for anyone with an oily skin complexion

Antiseptic effect: Aloe Vera contains 6 antiseptic agents: Lupeol, salicylic acid, urea nitrogen, cinnamonic acid, phenols and sulfur. They all have inhibitory action on fungi, bacteria and viruses. It treats face acne. Aloe Vera gel contains two hormones: Auxin and Gibberellins. These two hormones provide wound healing and anti-inflammatory properties that reduce skin inflammation.

Adding an Aloe Vera lubricant solution as enhancing agent

For personal care products containing a nonwoven component, having petrolatum-based lotions applied thereto has been filed. There continues to be a desire for a topical treatment for a nonwoven substrate that can prevent or reduce the occurrence of a number of common skin disorders associated with cleansing non woven wet wipes. There is also the need to maximize application transfer to the skin at minimum topical application add-on with demonstrable skin health benefits.

The most commonly used lubricant is petrolatum. Melting this and making an emulsion with Aloe Vera you have an improved method for applying an effective concentration of Aloe Vera to a wet wipe article. The Aloe Vera solution can be applied by a variety of processes. A particularly preferred process involves impregnate the Aloe Vera solution.

Additives Bring Benefits

Topping off a feast of possibilities for wipes performance is the additives available to product developers. Offer to your clients for every type of task-specific need Aloe Vera lotion, a skin-friendly, natural and petroleum-free glycol alternative in wet formulations. Additives further advance goals set out when fiber choices are made, and they can introduce features not available otherwise. The range is wide, including fragrance, cleansing, polishing, soothing, tanning/screening and so many more specific advertised aspects that attract buyers

When wet wipes exhibit the full force of selected nonwovens and additives, their attractiveness is so much more than packaging, graphics and promotion. Repeat purchase and loyalty are more likely assured. Simply, they are what consumers expect.

Add more life to your products with natural bioactives from Aloe Vera

From a technical perspective, as chemists develop new and improved surfactants, future versions of wet wipes will contain milder and more effective cleansing ingredients. Trends in fragrance and featured ingredients, as Aloe Vera, will also impact a successful formulations

Be creative with Aloe Vera

Aloe Vera is a skin health enhancer for soft wet wipe or wipe-type product, such as a baby wipe, an adult wipe, hand wipe, a face wipe, a cosmetic wipe, a personal cleansing wipe, cotton balls, cotton tipped swabs, pads and the like, can be made by combining the wipe with Aloe Vera combined with an oil-in-water emulsion composition comprising a natural fat or oil, sterol or sterol derivative, humectant, emulsifying surfactant, use Aloe Vera solution instead of water.

Convert Aloe Vera into a waterless lubricant solution, and apply the solution of Aloe Vera to areas of the absorbent product in contact with skin. Increase the comfort and mobility with lotion mixing Aloe Vera with a surfactant as Silicon molecules or Petrolatum-based lotions to your nonwoven surface materials.

Aloe wipes is an natural ongoing innovation of the wipe market

Add high value to your wipe line products, applying containing botanical extracts as Aloe Vera, in that the latter are intended to deliver an active agent, applied to the humectant formula in contact with skin

Aloe is suitable for all skin types, which means it's good for the whole family

Botanical blend of Aloe and other botanical extracts nourishes skin

Formulate impregnating compositions for nonwoven wipes with well-being additives or Aloe Vera natural additive, leaving skin feeling refreshed and moisturized.

Aloe Vera helps to maintain skin barrier function, particularly in the diapered skin environment, such as a wet wipe or wipe-type product that:

- Deposits suitable moisture on the skin to enhance skin barrier
- Minimizes physical damage to the skin due to wiping
- Leaves the skin feeling soft and supple
- Provides a long lasting benefit until the next wiping event while still providing effective cleaning while providing skin barrier enhancement.
- Helps to maintain the soft, smooth, and pliable appearance of the skin by their ability to remain on the skin surface or in the stratum corneum to act as lubricants to reduce flaking, and to improve the skin's appearance.

Regenerates the skin for a smoother, even skin appearance

Mechanism of actions of aloe vera in wet wipes lotion

Aloe Facial Masks

The facial mask adds natural Aloe Vera extract which possesses rare Amino acid, proteins, vitamins. It provides skin with abundant moisture, mends skin, promote metabolism, and nourishes skin with sufficient nutrients. Leave your facial skin feeling soft and supple, excellent for sensitive skin.

Aloe Vera is a natural moisturizer and has deep penetrating effect, applied in facial products.

Baby Care

Baby wipes are disposable cloths used to cleanse the sensitive skin of infants. These cloths are made from non-woven fabrics similar to those used in dryer sheets and are saturated with a solution of gentle cleansing ingredients. Baby wipes are typically sold in plastic tubs or boxes that keep the cloths moist and allow for easy dispensing.

Baby wipes are designed to be durable enough for heavy duty cleaning tasks, yet still be disposable. The fabric used for the cloths is chosen on the basis of durability, cost, and absorbency. This fabric is then saturated with a cleansing solution designed to be mild yet effective. Add Aloe Vera to the wet wipes solution, and increase commercial value for your customers, prevent diaper rash with Aloe Vera wipes makes stay wet longer, improve dirt removal, softer touch and is gentle to baby's skin. Aloe Vera is a natural and versatile ingredient to promote successful products through natural products and materials

Create the gentlest formulation with Aloe Vera in wet wipes with Aloe Vera, which moisturizes and reduces the detrimental irritation and rash

Diapered skin is normally cleansed several times a day with wipes utilizing solutions containing surfactants decreasing the barrier function. The wet wipe can cause physical abrasion damage to the skin, reduce this occurrence with Aloe Vera.

Aloe Vera is natural moisturizer of skin

Help to prevent Diaper rash with Aloe Vera wet wipe that stay wet longer, dirt removal, softer touch, gentle to baby's skin. Aloe Vera is a natural and versatile ingredient to promote successful products through natural products and materials

Diapered skin is normally cleansed several times a day with baby wet wipes, utilize solutions containing surfactants decreasing the barrier function. Prevent or reduce irritation adding Aloe Vera with Vitamin E or formula with petrolatum or surfactants and oxide zinc. One of the main uses of Aloe Vera gel for wet wipes is to improve the health of the baby's skin and to prevent diaper rash, Aloe Vera gel acts as a barrier and prevents sticking to affected area. Absorbs excess wetness and helps keep the baby's skin dry and comfortable, Soft texture helps its skin feel smooth and fresh, being tough on diaper rash, wiping off easily and being gentle on a baby's tender skin

Aloe Vera helps to prevent irritation, reducing the immediate skin reaction, relieving the discomfort and preventing secondary infection and other complications. However, merely keeping the area clean and dry does not protect the irritated skin from the chemical irritation associated with the by-products of infant urine and feces. Improve your Baby wet wipes line of products with Aloe Vera extract

In response to the problems associated with diaper rash, add Aloe extract in the baby diaper gives an extra caring touch. Prevent Diaper rash with Aloe Vera wipes that stay wet longer, dirt removal, softener touch, gentle to baby's skin.
