Procedure:

Dilute aloe vera gel concentrate into water. Sift the Magnesium Aluminum Silicate into an established vortex in the water and mix until dispersed. Add the TSPP and mix until dissolved. Sift in the Xanthan Gum and mix at maximum available shear until the VEEGUM D is fully hydrated and the VANZAN NF is dissolved. Add the Part B ingredients in the order shown, mixing thoroughly after each addition. In Part C, dissolve the sodium fluoride in the water and then add to the batch. Add the sodium lauryl sulfate with very slow mixing to avoid air entrapment. Add the colorant and mix thoroughly.
