

Aloe Vera Stretch Marks Cream: Smooth Away Imperfections- Glycovera Derma

Benefits: Anti-inflammatory - Onco, Moisture - Onco, Scar treatment - Onco, Sunscreen – Onco
Used in: Stretch marks, Cellulite, Varicose veins, Inflammation, Onco treatment

Stretch marks are rippled streaks, medically called striae, which most commonly appear on the stomach, breasts, buttocks, thighs, and upper arms. Their appearance depends on their skin type and color. Stretch marks can appear red, pink, purplish-blue, or white on pale skin. On darker skin, stretch marks usually appear whitish or darker than the surrounding skin. Stretch marks occur when the skin is stretched too fast for the underlying connective tissue to keep up with the spurt. The connective tissue is the support structure that gives the skin its strength and elasticity.

Ingredients	% w/w
GLYCOVERA DERMA	3.0000%
Water	80.9398%
Aqua persea gratissima oil	2.0000%
Glycerin	4.0000%
Butyrospermum parkii butter	7.0000%
Sorbitan olivate	2.0000%
Cetyl palmitate	0.5000%
Sodium polyacrylate	0.5000%
Butylene glycol	0.0200%
Sodium lactate	0.0001%
Citric acid	0.0001%
Triethanolamine	0.0200%
Carbomer	0.0200%
Total	100%

Procedure: The procedure commences by pouring half of the water into a vessel and adding carbomer, followed by high-speed mixing until the mixture is free of lumps. Gradually, triethanolamine is introduced into the mixture while continuing high-speed mixing to create a gel-like consistency. Meanwhile, in a separate vessel, the remaining water and other ingredients (excluding Glycovera Derma) are combined and mixed at medium speed until a lump-free mixture is obtained. Subsequently, both mixtures are combined and mixed until homogeneity is achieved. Once the cream is formed, approximately 5% is extracted and blended with Glycovera Derma at high speed until smooth. This Glycovera-infused cream is then reintroduced to the rest of the cream and mixed at high speed until complete incorporation.
